

Articulate Storyline Intermediate Workshop

As a participant of the Articulate Storyline Intermediate 1 day Workshop, you will gain further understanding of Storyline. This includes learning how to create master slides, surveys and quizzes, how to use Storyline screen recording software and edit the recording, as well as how to create a customised player.

This workshop assumes some previous knowledge of using Storyline. However, the workshop will also be of great help to people who are currently attempting to use the software and those with limited exposure to it.

Course Details

Skill Level:	Intermediate
Duration:	One Day
Time:	9:00am – 4:00pm (approx)
Class Size:	10 students (max)

Course Content
